

The diagram shows two rectangles, one on the left and one on the right, with various colored lines connecting points on their boundaries. The diagram illustrates a geometric construction or a mapping between the two shapes.

- Left Rectangle:** A rectangle with a horizontal line segment near the top. Points are marked on its top, bottom, and left boundaries.
- Right Rectangle:** A rectangle with a horizontal line segment near the bottom. Points are marked on its top, bottom, and right boundaries.
- Connections:**
 - Blue Lines:** Connect the top-left corner of the left rectangle to the bottom-right corner of the right rectangle, and the top-right corner of the left rectangle to the bottom-left corner of the right rectangle.
 - Orange Lines:** Connect the top-left corner of the left rectangle to the top-right corner of the right rectangle, and the bottom-left corner of the left rectangle to the bottom-right corner of the right rectangle.
 - Purple Lines:** Connect the top-right corner of the left rectangle to the top-left corner of the right rectangle, and the bottom-right corner of the left rectangle to the bottom-left corner of the right rectangle.
