

Diagram illustrating the mapping of points from a "before" state to an "after" state. The "before" state shows a vertical line of points with a rectangular box around a central cluster. The "after" state shows a similar vertical line, but the central cluster is now a rectangle with a horizontal line through it. Colored lines (blue, purple, orange, light blue) connect corresponding points between the two states, showing a transformation. The labels "before" and "after" are at the bottom.
