

The diagram illustrates a mapping between two sets of nodes. On the left, there is a vertical column of 15 nodes. A box encloses the 6th through 10th nodes from the top. On the right, there is a similar vertical column of 15 nodes, with a box enclosing the 6th through 10th nodes from the top. Connections are as follows:

- Red lines:** Connect the top node of the left column to the top node of the right column. Connect the 11th node of the left column to the 12th node of the right column. Connect the 13th node of the left column to the 14th node of the right column.
- Purple lines:** Connect the 2nd node of the left column to the 11th node of the right column. Connect the 3rd node of the left column to the 12th node of the right column. Connect the 4th node of the left column to the 13th node of the right column. Connect the 5th node of the left column to the 14th node of the right column. Connect the 6th node of the left column to the 15th node of the right column. Connect the 7th node of the left column to the 16th node of the right column. Connect the 8th node of the left column to the 17th node of the right column. Connect the 9th node of the left column to the 18th node of the right column. Connect the 10th node of the left column to the 19th node of the right column.
- Orange lines:** Connect the 11th node of the left column to the 11th node of the right column. Connect the 12th node of the left column to the 12th node of the right column. Connect the 13th node of the left column to the 13th node of the right column. Connect the 14th node of the left column to the 14th node of the right column. Connect the 15th node of the left column to the 15th node of the right column.
- Light blue lines:** Connect the 16th node of the left column to the 16th node of the right column. Connect the 17th node of the left column to the 17th node of the right column. Connect the 18th node of the left column to the 18th node of the right column. Connect the 19th node of the left column to the 19th node of the right column.
